# GUERRILLA WARFARE

**Bert "Yank" Levy**

GUERRILLA WARFARE is the classic "how-to" work on irregular and partisan fighting which served as a text to train the English Home Guard when England was threatened with invasion by the Germans in World War II. Written in an easy-to-understand style for those citizens with little military experience who find themselves suddenly faced with occupation by a foreign aggressor, Levy explains how a relatively untrained but determined citizenry may successfully oppose and destroy a heavily armed aggressor.

"This is straightforward, simple stuff, and the author, very much a man of action, had only two main aims: to cover the subject as comprehensively as possible, and to get the message across. He succeeded admirably."—The Irish Defense Journal.

"While many of the references are related to the potential German invasion of England, the techniques described are equally valid in many areas of the world today."—Military Review.

**Introduction by Franklin Mark Osanka**

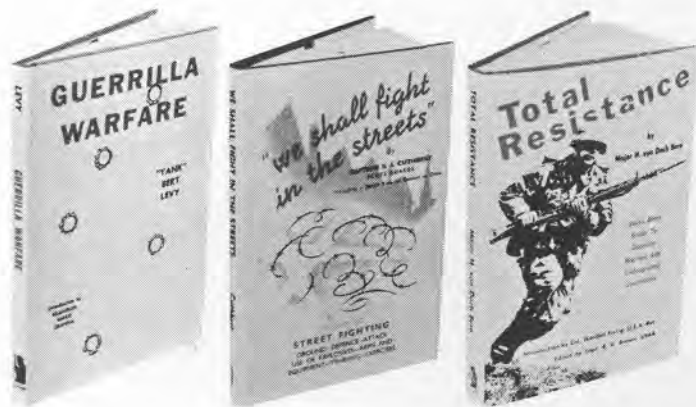

Levy flavors his book with personal experiences and observations from three decades of participation in a multitude of civil wars, revolutions and gun running forays. Sabotage, ambushes, demolition, scouting, stalking, street fighting, and anti-tank tactics are but a few of the topics that "Yank" discusses at length. GUERRILLA WARFARE is a necessary background book for students of guerrilla and irregular warfare.

"... a brief, business like discussion of contemporary strategy, tactics, and tricks for people caught in an invasion."—Time

"This is a how-to-do-it book, not a dissertation on strategy or foreign policy."—Army Times

## WE SHALL FIGHT IN THE STREETS

**Captain S. J. Cuthbert, Scots Guards**

This manual, used as a companion text with GUERRILLA WARFARE by "Yank" Levy to train the English Home Guard during World War II, ably describes and evaluates the unique features of heavily populated areas which make street fighting such a highly skilled, specialized form of warfare in which only the fittest can survive. Its author, Captain S. J. Cuthbert of Great Britain's Scots Guards, explains in detail how to turn a city into a death trap for an invading enemy. Subjects covered include an evaluation of cover and concealment within a built up area, defense and attack within cities, anti-tank tactics, ambushes, explosives and demolitions, booby traps and fortifications. A recent article from **Infantry Magazine**, "Combat in Cities: A Soviet View," has been added as an appendix.

# WAR IN VIET NAM

We are dedicating a major portion of our new 1966 catalog to the war in Viet Nam. The importance of this struggle should be evident to anyone interested in unconventional warfare and counterinsurgency. For the outcome of the Viet Nam conflict will in a large part indicate whether Communist sponsored insurgencies can be destroyed or neutralized by the free world; whether the West in general and the United States in particular will develop the necessary flexibility to blend political, economic and social reforms in with aggressive military action to not only destroy the Communist military force but also eliminate the equally dangerous Communist infrastructure. We believe we have obtained the most comprehensive listing of books on the Vietnamese situation available. All aspects of the political and military spectrum are covered in depth. In order to obtain balance and allow the reader to get a broadest view possible, we have also included titles which maintain we should withdraw from Viet Nam. For the individual who is just beginning to upgrade his knowledge on Viet Nam, we recommend Anthony Harrigan's new book described below.

*The Editors*

## A GUIDE TO THE: WAR IN VIET NAM

**Anthony Harrigan**

This newest book on the Viet Nam war provides a concise yet revealing insight into this crucial struggle. Harrigan, a well known military writer and foreign correspondent, points out the peculiar characteristics of this guerrilla war, describes the terrain, and analyzes the war's progress. He then presents an accurate portrayal of both the Viet Cong and the much maligned Arvin soldier; evaluates new weapons and techniques being introduced by the American forces and details the operations of the South Vietnamese "Junk Navy" and its American Navy advisors in their fight for control of Vietnamese rivers and coastal waters.

In a series of vignettes, Harrigan then discusses the problems of village defense, strategic hamlets; countering the Viet Cong with their own terror tactics; how the Viet Cong were able to penetrate and inflict heavy damage on important U.S. bases. Harrigan evaluates the effect American air power is having on the VC, including the use of the B-52 heavy bombers. He maintains that the American fighting men in South Viet Nam have quickly and effectively adapted themselves to the terrain and consequently have refuted the supposition that U.S. troops would "get bogged down in Asian jungles."

Anthony Harrigan, presently Associate Editor and military writer for the Charleston News & Courier, is a member of the Strategy Staff of the American Security Council and has recently joined **PANTHER PUBLICATION'S** Board of Advisors. His articles have appeared in the *Marine Corps Gazette*, *Australian Army Journal*, *Commando*, *Armor*, *Ordnance*, *Military Review*, *Canadian Military Journal*, *Royal United Service Institute Journal*, *Revue Militaire Generale* and others.

## THE GREEN BERETS

**Robin Moore**

Here, in an explosive book, are the previously untold stories of a group of true-life heroes—the men of the hush-hush U.S. Army Special Forces, who have made their distinctive green beret a badge of courage in the jungles of South Vietnam and the world over. These dedicated, highly specialized soldiers, who are paratroopers, frogmen, and commandoes rolled into one, have the thankless task of acting as military advisers in this tragic war.

Moore, who went through guerrilla training and fought alongside the Special Forces men in Vietnam, tells the stories of guerrilla experts, combat medics, chopper pilots, women spies in their fight against the VC. Some of the stories would be incredible—if they weren't so solidly rooted in fact.

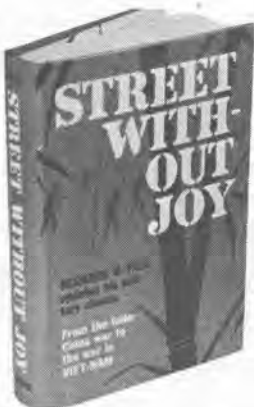

For example: the Special Forces CO who at the height of a VC attack finds his base being raked inside his defense perimeter by a bunker obviously manned by the enemy—and calmly blows it sky-high with a previously planted demo charge; the South Vietnamese officer who ambushes a Special Forces detachment because they have discovered his vast graft operations; and of the Frenchman, known as the "Cowboy," who advises the VC in hopes of preserving his properties. A best seller for months!

"Once in a lifetime you can read a book like this—the authentic inside story of something that's happening as you read it . . . he has produced the 'most inside' story yet of modern guerrilla warfare."—American Legion Magazine

"The GREEN BERETS has stirred a luss in Washington. The official objection to the book apparently is that it is too close to fact."—Hanson W. Baldwin, The New York Times

## STREET WITHOUT JOY

Insurgency in Indochina

**Bernard B. Fall**

In this penetrating, searching study, the author first tells how war came to what was then called French Indochina. He recounts how the Viet-Minh under two life-long Communists gained a foothold during the Japanese occupation; how when VJ-day dawned they were ready to take over the country and the anti-colonial revolution; how they later avoided being drawn into set-piece battles; and how today they apply the same methods with deadly efficiency against the South Vietnamese and the Americans. STREET WITHOUT JOY details the battles that sealed the fate of close

to 100,000 French soldiers and now of many U.S. servicemen; the failures of the tacticians to recognize the unconventionality of guerrilla warfare then and now. For all free men who care about aggression any-time, there are lessons to be learned from STREET WITHOUT JOY.

## BACKGROUND TO VIET NAM

**Bernard Newman**

Patrolling rice paddy fields with the French Foreign Legion, probing VC ridden jungles with the Vietnamese Rangers and working with peasants, ministers, and officials, European journalist Bernard Newman gathered material for his first-hand account of "what's happening" in Viet Nam.

## THE TWO VIET NAMS

A Political and Military Analysis

**Bernard B. Fall**

This full-scale study of both the South and the invading North provides essential background for an understanding of the conflict. Drawing on ten years of firsthand observation of this battlefield, Dr. Fall, the author of STREET WITHOUT JOY shows how the "First Indochina War," culminating in the French defeat at Dien Bien Phu, opened the way to the division between North and South. He examines the tactics of the Communist guerrillas invading the South, using their pre-1954 experience in coercing and convincing the peasantry to become their passive accomplices. And he explores the South Vietnamese response, relying on conventional, less mobile strategy, long hamstrung by a rigid government that did not command the loyalty of its people. The new rulers will have to move quickly to overcome the chaos and to unify the country against a North whose tentacles now reach down into the rice-rich tip of South Viet Nam.

The author shows how little the U.S. has deviated from the pattern that led the French to defeat in Indochina; he notes the same mistakes being repeated with desperate regularity—but on a larger scale and at the cost of American lives and American money; he describes the training of Vietnamese soldiers for a war that was never likely to come. 505 pp. tables, maps, appendixes, index Praeger \$7.95

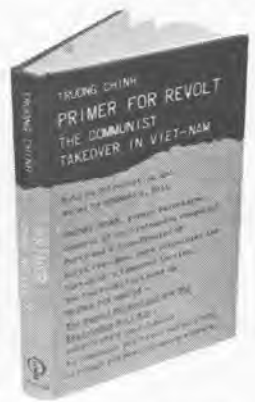

## PRIMER FOR REVOLT

The Communist Takeover in Viet Nam

**Truong Chinh**

Truong Chinh, former Secretary-General of the Vietnamese Communist Party and a Vice-Premier of North Viet Nam, here chronicles the Viet-Minh's takeover tactics. The two books that make up PRIMER FOR REVOLT—THE AUGUST REVOLUTION and THE RESISTANCE WILL WIN—constitute a candid guide to Communist political and military strategy for revolutionary warfare. These books are used as field manuals by the VC in South Viet Nam today. 213 pp.

## COMMUNIST REVOLUTIONARY WARFARE

The Vietminh in Indochina

**George K. Tanham**

Tanham's study of the military aspects of the Vietminh's successful struggle against the French in Indochina not only analyzes events in this crucial region, but draws lessons for future guerrilla conflicts. He examines the Vietminh concept of protracted conflict, developed over eight years of war and describes the military organization, tactics, and logistics of the Vietminh revolutionaries.

## THE BATTLE OF DIENBIENPHU

### Jules Roy

The conflict raging now in South Viet Nam is Phase Two of an old war. Phase One ended catastrophically for the West in 1954 at Dienbienphu, the most devastating battle since World War II and the most fateful for the world. Day by day, Roy records the quickening tempo of disaster: the deepening entanglements of the French; the continual strengthening of the Viet; and, as the situation worsens, political maneuvering in Paris and Washington.

## MISSION IN TORMENT

An Intimate Account of the U.S. Role in Viet Nam

### John Mecklin

Mecklin served as Public Affairs Officer of the American Embassy in Saigon from May 1962 to January 1964 and was intimately involved with the U.S. Mission's operations at a policy-making level. He watched the deepening disenchantment as American good intentions and bravery in the field came to naught because of illusion and error among both Americans and the Vietnamese Government in Saigon. Now Mecklin speaks up in an effort to penetrate the fog that has obscured the Vietnam crisis. MISSION IN TORMENT will inevitably bruise some sensibilities, for it is a persuasive, knowledgeable book that reveals some unpleasant truths.

## WAR WITHOUT GUNS

### George Tanham

Tanham, author of COMMUNIST REVOLUTIONARY WARFARE, now tells the story of the unsung heroes of the Agency for International Development and their efforts to win the hearts and minds of the people in the Viet Cong-infiltrated central highlands, the Mekong Delta and the coast regions of Viet Nam.

## OUTPOST OF FREEDOM

### Capt. Roger H. C. Donlon

Special Forces Captain Donlon, the only man to win a Congressional Medal of Honor since Korea, narrates the thrilling story of how a 12 man Special Forces "A" team and their Vietnamese allies defended one tiny outpost of freedom against a major Viet Cong attack. Provides an excellent insight into the methods used by the elite Special Forces in combating the VC; the degree of success they have had—are having.

"President Kennedy called the green beret 'a symbol of excellence, a badge of courage, a mark of distinction in the fight for freedom.' . . . Captain Donlon and his team . . . showed once again the sacrifices that brave men will make for their country."—Sen. Robert F. Kennedy

## THE NEW FACE OF WAR

### Malcolm W. Browne

Malcolm Browne, who has been providing Associated Press coverage in Viet Nam since 1961, provides a useful examination of Viet Cong tactics, techniques, and mentality, and compares them with those of "our side." He calls the shots as he sees them—which makes our side look bad.

As for the nature of the war, he points out in conclusion that: "The primary distinguishing military feature of the Vietnamese war is the ambush." "Part of the new face of war here, as I see it, is the use of terror for terror's sake." "More than any other aspect of the new face of war, the involvement of entire families is critical."

For the soldier there are down-to-earth, accurate pictures of the fighting in a weird, ambush-type war where the front can be anywhere, at any time. A definitely valuable contribution on VC methodology.

## OUR VIET NAM NIGHTMARE

### Marguerite Higgins

Long time war correspondent and Pulitzer Prize winner Higgins presents an eye-opening and controversial account of what has happened—and is likely to happen—in Vietnam as a result of American policy and actions. Miss Higgins traversed the length and breadth of Viet Nam (sometimes being shot at), visiting hundreds of villages, and interviewing everyone from Diem, Madame Nhu, Henry Cabot Lodge, and the goateed General Khanh, to spear-carrying Montagnard chieftains, American and Vietnamese soldiers in the field and monks in their temples . . . among them the sinister Thich Tri Quang, who, to further his incessant campaign against government—any government—in South Vietnam, dreamed up the suicide squads that dispense pills and gasoline to potential suicides.

It is Miss Higgins' thesis that we meddled ignorantly and disastrously in Vietnamese affairs, letting ourselves be hoodwinked into a series of incredible blunders that led to the overthrow of an ally (Diem) in the middle of war against a common enemy. Her book concludes with a thoughtful summary of the present crisis and future possibilities.

## VIET NAM DIARY

**Richard Tregaskis**

The first definitive eyewitness account of the combat in Vietnam, this unforgettable, vividly illustrated report records the story of the Americans fighting in a new kind of war. Tregaskis, one of the most knowledgeable, experienced American war correspondents, describes the biggest U.S. military effort since Korea and its new techniques for combating guerrilla forces. Roaming

the whole of war-torn Vietnam, Tregaskis takes his readers on tense U.S. missions—with the Marine and Army choppers; with the ground pounders on the embattled Delta area; then to the Special Forces, who train Montagnards to seek out and destroy the VC in the high jungles. From there the author goes on to the junk fleet patrolling the seacoast against the VC. Chronicling the first concerted U.S. effort to beat back guerrilla forces, it is a remarkable story of today's risks and techniques that are setting a pattern for the future in the most explosive trouble spot in the world.

## THE LOST REVOLUTION

**Robert Shaplen**

Robert Shaplen has been covering Southeast Asia since 1943—formerly as head of Newsweek's Far East Bureau, now as the New Yorker's Asian affairs expert. In **The Lost Revolution** he reveals many amazing facts that have been hitherto undisclosed, and he details the tragic story of our many missed opportunities in Southeast Asia, Vietnam in particular. He sheds new light

on Ho Chi Minh and focuses sharp attention on Laos and Cambodia in relation to Viet Nam. **The Lost Revolution** is the first book that truly enables Americans to understand precisely **how** and **why** we became caught up without knowing it, in a revolutionary situation in a vital area.

# UNCONVENTIONAL WARFARE AND COUNTERINSURGENCY—BY COUNTRY

## MODERN GUERRILLA WARFARE

Fighting Communist Guerrilla Movements, 1941-1961

**Edited by Franklin Mark Osanka**

Here is the first comprehensive background study of the uses of guerrillas in modern warfare. In thirty-seven contributions, including the basic writings of Lenin and "Che" Guevara on the subject, leading civilian and military authorities describe and analyze major guerrilla movements of the last twenty years.

This book shows how the Communists, in particular, have mastered guerrilla tactics and applied them to the contemporary scene—how they have used guerrillas to further political subversion, economic disruption, social disorganization, and propaganda dissemination, along with terror. Here also is evidence that this form of warfare is being understood in the Free World and that successful counter-guerrilla measures have been devised, tested and proved effective.

## 150 QUESTIONS FOR A GUERRILLA

General Alberto Bayo  
Edited by Robert K. Brown

How was Castro able to defeat Batista's well-trained and equipped army of thirty thousand? How was he able to build a guerrilla army of thousands from an initial band of only twelve men in two years? The answers lie in the person of a mysterious Spanish revolutionary who served as Castro's chief military mentor and advisor throughout the fight against Batista—General Alberto Bayo.

Bayo conducted a guerrilla warfare training camp for Castro and his followers at a secret camp in Mexico. Without this training the revolutionaries would undoubtedly have been wiped out upon landing in Cuba. Now for the first time, **PANTHER PUBLICATIONS** has made available a complete English translation of the military text Bayo wrote and used to train Castro as well as other Latin American revolutionaries. Includes twelve illustrated pages of do-it-yourself booby traps and demolition devices. Bayo presently heads up guerrilla camps in Cuba where Communist revolutionaries are being trained.

## NOTES ON GUERRILLA WAR

Principles and Practices  
Colonel Virgil Ney

This compact volume is the product of well-documented research in the field of unconventional warfare which has been carefully evaluated and interpreted against the background of the author's experience. It is a creditable effort to reduce the factors in guerrilla war to a set of ten principles to guide operators and planners in future operations.

## COUNTERINSURGENCY WARFARE

Major John S. Pustay,  
U.S. Air Force

Major Pustay offers a practical, down-to-earth policy for the prevention of Communist sponsored insurgencies. He begins with a detailed analysis of the current revolutionary scene: Viet-Nam, Cuba, Burma, Malaya, etc. He then discusses four stages in the growth of insurgent activity: Infiltration/subversion, small unit operations, insurrection, and civil war. Following this, the author outlines a strategy that can be effectively employed by the U.S. against insurgencies.

## THE WAR OF THE FLEA

Guerrilla Warfare in Theory and Practice

Robert Taber

Taber presents an interesting but overly simplified explanation of the motivating forces behind the various revolutionary movements of today and tomorrow. His main thesis is that the underprivileged, uneducated masses of the world are gradually resorting to violence to adjust long standing injustices—both political, economic and social—committed by the traditional custodians of wealth and power with whom, he claims, the United States is allied.

He maintains that these forces, because of the nature of their struggle and cannot be denied victory. Taber's prejudices and favoritism can be more easily understood when one realizes that Taber has long been a supporter of the Cuban Communists and Castro. Nevertheless an interesting work.

## WARFARE IN THE ENEMY'S REAR

Otto Heilbrunn

In this book, Heilbrunn presents the first systematic study of modern warfare in the enemy's rear. Many Allied and Axis forces who fought in WW II in the enemy's rear are dealt with. He discusses the Special Boat Service, the Long Range Desert Group, and the Chindits; the American Rangers, and Marauders; the Australian Independent Companies; the German Brandenburg Division, and Skorzeny's Special Formation; the Japanese Raiding Units, and numerous others; also mentions the partisans in France, Russia, Yugoslavia. Goes a long way toward solving the problem of countering guerrilla-type operations.

"It is high time we had a systematic approach to the study of forms of warfare more closely characteristic of the time we live in than almost any others. This book, at last, presents it."—Lt. Gen. Sir John Hackett, Deputy Chief of the Imperial General Staff.

## COMMUNISM AND REVOLUTION

The Strategic Uses of Political Violence

Edited by Cyril Black and Thomas Thornton

This book is a compilation and analysis of the writings of several authors who have researched the various Communist revolutions that are taking place and have taken place throughout the world. The editors have correlated this material into a comparative analysis of world-wide Communist revolutionary methods. COMMUNISM AND REVOLUTION provide the reader with a good understanding of the nature and the threat of Communist revolutionary warfare as applied through political violence. It will be of special interest to individuals who are interested in the politics of Communist revolution and would like a good reference source for further study on many of the present and past Communist revolutions.

## THE GUERRILLA — AND HOW TO FIGHT HIM

Selections from the Marine Corps Gazette

Edited by Lt. Colonel T. N. Greene

From the Marine Corps Gazette, Colonel Greene has chosen fifteen pieces that constitute an authoritative, practical analysis of the history, politics, theory, and conduct of guerrilla and counter guerrilla warfare. Several experts give firsthand accounts of actual campaigns. Contributors include Roger Hilsman, Walt W. Rostow, Bernard B. Fall, E. L. Katzenbach, Jr., and Brigadier General Samuel B. Griffith II.

## GUERRILLA

Charles Thayer

Thayer writes with authority on the subject of irregular warfare, having had wide firsthand experience of Communists and Communism and having served during WW II with Tito's Partisans. He presents typical combat vignettes particularly applicable to many revolutionary or guerrilla wars and then surrounds these stories with summaries of these campaigns. Covers revolutionary wars in Cuba, the Philippines, Indochina, Malaya, and Cyprus. Guerrillas in conjunction with regular forces and urban guerrillas are allotted separate chapters. The final chapter suggests that our high command be reorganized to include a permanent

counterinsurgency command in order to solve the difficult problems of policy, command and logistics involved in fighting such wars and conducting our own operations inside the Iron or Bamboo Curtains.

## WORLD REVOLUTIONARY ELITES

Studies in Coercive Ideological Movements

Edited by H. D. Lasswell and Daniel Lerner

WORLD REVOLUTIONARY ELITES presents studies in depth of four classic political uprisings of our time and of the elites who led them: The Politburo in Russia; the Fascists in Italy; the Nazis in Germany; the Kuomintang and Communists in China. In each study, the authors examine the background and character of the revolutionary elites; the conditions in each country that spawned the rebellion; and the ideological means by which these elites achieved and held power.

## COMMUNIST GUERRILLA WARFARE

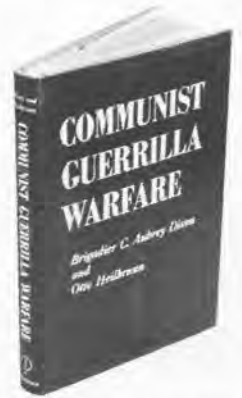

Brigadier C. Aubrey Dixon and Otto Heilbrunn

The authors focus on guerrilla warfare in a European setting. In light of recent exploitation of terror and other guerrilla tactics by the Secret Army Organization in Algeria, there is renewed interest in the potentialities of guerrilla operations in urban areas linked by highly developed communications systems. In this vitally important field, the authors offer the first thorough scientific study.

In concentrating on the German-Soviet battlefield in WW II, the authors describe Soviet guerrillas in action, their organization and tactical operations, especially their relationship with regular-army forces. They deal also with German counter-guerrilla efforts and in a concluding chapter formulate a set of rules to deal with ground fighting in depth.

## COUNTERINSURGENCY WARFARE

Theory and Practice  
David Galula

In this guide to counterinsurgency warfare, the author outlines a doctrine for the counterinsurgent on both theoretical and practical grounds. Like a modern Clausewitz, he formulates the "laws" of counterinsurgency and the principles of strategy deriving from them. He traces procedures step by step, area by area until the entire nation has been cleansed of the insurgent, and examines command and organization implications at all echelons, stressing the primacy of civilian over military leadership.

## MODERN WARFARE

A French View of Counterinsurgency

Colonel Roger Trinquier

Col. Trinquier has a long record of practical insurgency experience emanating from his combat experiences in Indochina and Algeria. He commanded all behind-the-line operations in Indochina from 1951 to 1954 and was in charge of the 3rd Colonial Airborne Regiment in Algeria that was responsible for sealing off the Tunisian border. Later he helped Tshombe organize his white-cadred forces. From his experiences he has developed a strategy to combat revolutionary insurgents. He concentrates on the tactics of fighting in cities and strategic hamlets and states his case for the necessity of controlling terrorists through torture.

## FRENCH REVOLUTIONARY WARFARE FROM INDOCHINA TO ALGERIA

The Analysis of a Political and Military Doctrine  
Peter Paret

From its experiences in Indochina and Algeria, the French Army evolved one of the most coherent and encompassing doctrines yet formulated in the West of unconventional warfare, involving subversion, insurrection, revolutionary-warfare. The recourse to terror and the deep extra-constitutional involvement of the French adherents of revolutionary warfare in the political life of their country (they formed the core of the OAS in Algeria) were outgrowths of the totality of their effort to wage counterrevolutionary warfare. Describing its impact on French political life, the author considers the far-reaching problems that may develop

## BURMA

### BEHIND THE BURMA ROAD

Gen. W. R. Peers and Dean Brelis

The most successful guerrilla operations ever carried out by Americans took place in the mountains of Burma between 1943 and 1945. Field units of the famous 101 Detachment of Wild Bill Donovan's O.S.S., using unconventional guerrilla tactics, whittled the mighty Japanese 18th Division into nothing more than an ineffective hoard. The authors, who were in the field with the 101, detail the difficulties and

perils of attempting a type of war that had not been heretofore used in such terrain. From these experiences developed one of our first set of doctrines for unconventional warfare.

### THE COMMUNIST CONQUEST OF CHINA

A History of the Civil War 1945-1949

General Lionel M. Chassin

This book is written by one of the first Western military thinkers to fully grasp and describe the significance of Mao Tse-tung's concept of "revolutionary warfare." In tracing the rise of Mao's forces from their almost bandit-like beginnings to one of the most formidable armies in the world, General Chassin never loses sight of the important role played by such "nonmilitary" factors as Communist propaganda and political agitation. The major sources of this book consist largely of secret intelligence reports from the field of the French Second Bureau.

"YOU HAVE A SHORT MEMORY FOR MURDER, GENERAL GRIVAS! Not once is there any evidence of a twinge of conscience."—*The Daily Mail*

A master of the art of underground warfare, General Grivas' reply was that his conscience was clear—"I did my duty, as I saw it, to the end." He relates his experiences with the British Army in WW II, explains why he opposed the British, tells of his relationship with Makarios and other Cypriot leaders, and describes the conflict he regarded as a war of liberation and the British regarded as civil violence. A fascinating account that reveals the operational secrets of the man who defied 40,000 British troops for almost five years.

The French Army and Empire in Crisis, 1947-1962

**G. A. Kelly**

Since 1947 the French military establishment had been engaged in wars in which it had neither allies nor the active sympathy of much of its own population. While its government had ordered the Army to fight and win, first in Indochina and later in Algeria, it furnished neither the means nor the needed political direction. Thwarted in its mission, confused and misunderstood, the Army moved dangerously toward direct conflict with the civil government. In seeking the reasons for the Philippine government's victory over the Huks, the authors—one a Filipino, one an American, both veterans of this struggle—have prospects of counterinsurgency operations. This how-to-do-it book is an authoritative, step-by-step account of how effective methods were developed to turn near defeat into victory. Probably the outstanding contribution of this book is its emphasis of the role that intelligence methods used to determine guerrilla strengths and weaknesses play in securing lasting victory.

Three Years Behind Enemy Lines in the Philippines

**Col. R. W. Volckmann**

This is Colonel Volckmann's personal account of his experiences in guerrilla warfare and in the resistance movement against the Japanese. He records the slow building via the underground from the original four men to a guerrilla force of over 20,000 Filipinos and Americans which crushed the Japanese forces in Northern Luzon.

# THEY FOUGHT ALONE

**John Keats**

When American forces in the Philippine surrendered in 1942, a mining engineer named Wendell Fertig chose to take his chances in the jungle. This book tells the amazing story of how Fertig built a guerrilla army of 35,000 men from a handful of Americans in his three years behind enemy lines; how they fought a seemingly hopeless war against superior Japanese forces. They made bullets from curtain rods; telegraph wire from iron fence. They fought off sickness, despair and rebellion within their own forces. Their homemade communications were MacArthur's eyes and ears in the Philippines. When the Americans finally returned to Mindanao, they found Fertig virtually in control of one of the world's largest islands and at the head of a civil government with its own post office, law courts, currency, factories and hospitals. Col. Fertig has recently joined PANTHER PUBLICATIONS Board of Advisors and has written an introduction to **TOTAL RESISTANCE**.
